Overview

The 1 Universe Ethernet Box from Cooper Controls provides a single universe of DMX input or output to your Ethernet DMX distribution system. A universe of Art-Net DMX data can be output from the 1 Universe Ethernet Box to your lighting system.

The 1 Universe Ethernet Box is ideal for distributing DMX outputs wherever you need them, with its compact form factor and universal worldwide power supply. The unit is configured through an internal web server or via optional control software.

When combined with a ZerOS console, the 1 Universe Ethernet Box supports on-board configuration from the console, for a truly integrated system.

Whatever your lighting system, the 1 Universe Ethernet Box lets you place your DMX outputs wherever you need them.
